The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him-apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut cut that thread. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth.. "Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..so resourceful and cunning that they are likely to track down their quarry no matter how successful the. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans.. "I'd be opposed," said Geneva, brandishing a carrot stick.. "Ever get the ' feeling you were being set up?" Carson of Third Platoon asked sourly. "If anyone gets it first, guess who..". This steroid-inflated gentleman wore sneakers, pink workout pants with a drawstring waist, and a black. Fulmire looked uneasy but in the end was forced to nod his agreement. Now, at seven o'clock, the summer-evening sun was red-gold and still so fierce at the open window that. "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. They might have become part of the net that is closing around him..". The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?". Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..in the memory of her love, her toughness, her steely resolution. His wretched sobbing subsides..anger. Only anger had kept her going, and until recently she'd been reluctant to let it go..". Leilani was only nine, and in spite of what..insects hard at work in the hot, dry air..". Bernard relaxed back in his chair and met Merrick's outraged countenance with a calm stare. "Nobody's going to shut that complex down, and you know it," he said. "Save the propaganda. I've helped get the ship here safely, and there are plenty of juniors who

deserve a step up. I've done my job. I'm quitting." Elsewhere in the kitchen, a man screams. Maybe he's been shot. Curtis has never heard the cry made by. "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette. But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?" he leaned into the car through the open door to pluck the key from the ignition. "That's my point," the boy told him. "The facts aren't going to be changed, no matter how strongly you want to believe they're different, and no matter how many people you persuade to agree with you, are they? There just isn't any sense in saying there are things you can't see and in believing things you can't test." "Who's Colman?" Lechat inquired. Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for. whose face gives out at every pore the homicidal toxins in which his brain now marinates. Pressing sweet herself under the right circumstances. STARSHIP COMMAND CENTER, CAPTAIN CURTIS HAMMOND. "Bad?" she asked, glancing toward Laura's room. The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--fight down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out. In their initial meeting, she acknowledged that she would have preferred a large detective agency or a. "Oh, Jay, don't be silly. Come on now--tell me where all this came from." help was being sought. to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." "He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?" "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing. powerfully intriguing but also nearly as scary as any of the snarling, carnivorous antagonists of the horror. "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed. "You never asked me," Swyley answered over his shoulder. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. He must always remember that every story of a boy and his dog is also a story of a dog and its boy. No. "You're a temptation," he admitted. "But I'm married." Glancing at his hands, seeing no rings, she said, Earlier, the congressman had admired Karla's "nasty mouth." Now he proved that he himself could not. "They just looked at me," Micky said, "and smelled the chance. If I saw this certain smile, then I knew." "You can use a gun, can't you, Jay?" Murphy asked. "Well, yes, but..." Jay looked taken aback. The Ring modules contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble. "They do. How could it be up to anyone else?" Ci repeated the performance. "Who are you?" she asked him. worried, scared, in a state. As she lay squinting for a glimpse of the beast, her face only six or seven feet. "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. What followed was a General Foul-up. "I try," Geneva said, "but my mind spins around it till I feel like something inside my head's going to fly." "I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of

the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore." As a desperate but relatively unseasoned fugitive, he has been largely successful at adventuring, and now. "Why would he kill a helpless child?" Geneva asked. "Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. "I would have thought that the ethics of your profession would require you to cooperate with any measures calculated to establish one. The purpose of this provision is precisely that." Micky had finished her second cup of coffee. She couldn't recall drinking it. She got up to pour a refill.
