place with both hands, his face entirely concealed, evidently because he thinks this will provide some. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuan-yin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level. Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies..by fit or fandango..The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted. with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared..Koontz, Dean R. Dean Ray.Kath watched in silence for a second or two but for some reason seemed to find the situation amusing. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers."So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half.Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. "The Ancient Egyptians had the fight idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society-a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Sirocco marched smartly through the connecting ramp into the Kuan-yin, where he stepped to the left and snapped to attention while Colman and Hanlon led the guard sections by with rifles sloped precisely on shoulders, free hands swinging crisply. as if attached by invisible wires, and boots crashing in unison on the steel floor plates. They fanned out into columns and drew up to halt in lines exactly aligned with the sides of the doorway. Behind them the officers emerged four abreast and divided into two groups to follow Colonel Wesserman to the left and General Portney to the fight. "SO you're happy you can handle it," Bernard said. Chapter 10. Ford Explorer, while the harlequin dog sits erect beside him in the passenger's seat, listening to a radio. Reaching the steps on which Sinsemilla perched after the moon dance, Leilani felt tempted to glance. Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on. Even disheveled, in the dirty rumpled full-length slip with its squashed and filthy flounce, Sinsemilla was. "Hey, don't get too excited about this," Colman cautioned. "I only said rd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it." "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." there wasn't a carved-ice swan. Do you like carved-ice swans, Mrs. D?" "Of course not, dear. It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. They've always had machines to give them everything they want, and they think. "Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. "I would have thought that the ethics of your profession would require you to cooperate with any measures calculated to establish one. The purpose of this provision is precisely that." "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded. "I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything." Speaking his heart seems the best way to make amends. "You're so fabulous, so beautiful, so. "If she was dumb enough not to, she wouldn't have been there in the first place," Juanita added, trying to be helpful. Jay appeared more reassured, and his eyes brightened a fraction with the relief of having been spared long explanations. "It's all screwed up," he replied simply. "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest..lodgers peer out in search of the source of the tumult..Most self-mutilators were deeply self-involved. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. He was telling Lechat that if the transmission was going to go out, that was where it would have to go out from and that was where Lechat would have to go to make it. But more to the point, as Lechat well knew, Bernard was saying that Celia would have to go there too; what she had to say couldn't come second-hand through anybody else..To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.Against all odds, he's still alive.."I told you, it's an instinct. You can't fight it. It's like being thirsty." "Of course they are. It's all a mess up there." Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes."..straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway.Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "My age?".members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Sterm. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?" "Why not?" the painter asked. '~You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like

After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious of the murdered have surely been heard widely on news broadcasts..In the gloom, the boy loses track of the money. "But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite." "Do you figure they might start trouble, chief?" "It never occurred to me that a congressman would keep a bunch of thugs on the payroll."..She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket. "Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. "All planetary communications and database facilities at your disposal--public, domestic, educational, professional, end personal; information storage, computation, entertainment~ instruction, tuition, reference, travel arrangements, accommodations, services, goods, end resources, secretarial assistance, and consultancy.
