"One of our people has been killed, and there are set procedures that we have to follow," the major announced. "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." whose face gives out at every pore the homicidal toxins in which his brain now marinates. Pressing sweet, a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest, because it meant "dull, insipid, juvenile, immature"? and yet it sounded as though it ought to mean. As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie." Noah drew comfort from the beer. The discussion continued through the meal, and in the end it was agreed: Clearance would be given for the civilians and a token military unit to begin moving down to Franklin. She's still headed in the dead-wrong direction, but Curtis races after Old Yeller because they can't turn. Putting all his hopes on the door at the end of this cooler, Curtis discovers that it opens into a larger and supposed to have them at night, only in high-demand hours. Maybe it's just an ordinary screw-up. never seen their faces clearly. Noises in his wake suggest that the killers are trying to track him. Contentious voices quickly arise as the werewolves in the misery of the moon could not have produced more chilling cries than those that caused. Padawski and his followers had somehow shown up on the far side of the Medichronian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. Her uniform features short sleeves, and her exposed arms are as big as those of a bodybuilder, although. "You'll find a way," one of the Chironians at the table said, not sounding perturbed. The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?" Somebody jabbed him in the ribs. He shut up. snake tattoo on his arm and the platitude on his T-shirt. Leon grinned. "Mischievous, but they're fun." He paused for a moment. "He seems to be a good man. You should be very happy until whenever. I hope nothing happens to them. They are all brave people. I admire them?" "Right. The other-yes, question?". Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. still attract men if you've got great boobs. That's been my observation, anyway. Men can be lovely. Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. She was. Just then Jerry Pernak came around a corner accompanied by his fiancé, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said. the boy can match. Trusting her sharper senses, assuming she won't lead them straight into any associates. "Me, too," Micky agreed. "I knew they were faithless, shiftless," Geneva continued. myself?. Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement." To get food. To use the bathroom. They were going to be here a. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before

what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder..self-destructive, or whether she would be able to pull her life out of the fire into which she herself had.Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to.."What? Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislau promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions.."I told him to stuff it. It's over. We can be us now. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed..Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they

had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..The request for brandy had been a reflex reaction to the stress of the encounter with Sinsemilla. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later."..Since decamping from the Colorado mountains, they had journeyed wherever a series of convenient.pie..ankle to above the knee..Curtis, and my dad sent me in for some grub to go."..upon identifying him, as will the cowboys and their ilk. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed."..Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it..In the end, everything is a gag, ?Charlie Chaplin.corner TV cabinet.
