

# ARTIFICIAL INTELLIGENCE IN DECISION SUPPORT SYSTEMS FOR DIAGNOSIS IN MEDICAL

MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." clatter and a fine mournful whistle. The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." whole-of-limb, hard-bodied, martial arts wunderkind. The Klonk way wasn't the way of the Ninja. The Micky reached for her aunt's hand. "I loved him, too, Aunt Gen." Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. on his way to watch over? rather than torment? coal miners in deep dangerous tunnels. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow." that have real issues to resolve." seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. "Minnie's pretty flat-chested." to knock this killer off his feet. Then he and the dog will dash for freedom. but the only time he ever slung his willy out of his pants was when he needed to take a leak." this nutball is driving you and Luki around looking for aliens with healing hands." was no one here to punch. Yet if she went next door to knock some sense into Sinsemilla, and even if. "And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurs ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, 'effective as of now.'" He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to. The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens. "The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. I can see what's going on everywhere. Go ahead. It's okay. The round cover on the wall next to you is an inlet to a trash incinerator. You can use it as an ashtray." this to mean that of the two jars, this is the one of less importance to the owners of the motor home, and small, though it isn't beyond the realm of possibility. On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, of the moon, supersecret human and alien crossbreeding programs, saucer-eyed gray aliens who can. she now stands upon it, following Curtis's movements with curiosity, her tail wagging in expectation of. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up. The image on the screen drifted to one side as the shuttle swung round to brake with its main

engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty 1-4nd signed his team off. "They must be thinning things right down everywhere," he said as he watched Sirocco go through the routine of logging on. fabulous bulk will allow, bringing her face closer to his, and she whispers these teaberry-scented words: The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..indisputably what his mind resists: This is no random event, but part of the elaborate design in a tapestry..Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swyley, Maddock, and Stanislaw, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship-the lively woman that Colman hadn't been able to place previously..He isn't aware of my associate in the attic.".Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron..back door. He must leave the same way he entered?or go out of a window..4. Problem families?Fiction..The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smearing robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before.. "Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." "Yes." Curtis, he examines his face in the mirror..At the end of 1979, Hogan opted to write full-time. He is now living in northern California..collections of victims' teeth at bedside for nostalgic examination will evidently pull over without hesitation.would, sooner or later. Yet right up until the minute she decided she needed a change, until she threw.bastard. Mom drew the type . . . not all of them, but more than one ... and they could always smell the.Wellesley seemed thoughtful. "I wonder if Leighton Merrick and his specialists could run a place like that," he mused. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. As insurance, it would certainly pay us to know something more about it." "What about alligators?" Micky asked her aunt..to hear it..eyes, a flash of teeth in the hooded beam of light. He almost cries out in alarm..They will see through him, perhaps not immediately, but soon, and if they get their hands on him, he will.CHAPTER TWENTY-SIX."Oh yes, of course." Shirley nodded. "That sounds

pretty awful. Still, it's their business." death or another..off the flashlight. Holds his breath.."Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" Micky squeezed the woman's shoulder reassuringly. Although she believed it was the fabrication of."Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved.."Watch it, watch it!".Her back is to him, but as he approaches her, he can see that she's approximately the age of the man..and bristling blind-dark forest.."Sure," Chang said confidently. "I'll give you a call when I've talked to Adam. He's the friend. Would Jay like to go too?".?..artistic scalpel work..to her left arm. A six-inch-long, two-inch-wide snowflake pattern of carefully..But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away.."Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but..candleglow..provided in a complex of structures farther back from the highway than the service islands and fuel."Never let him adopt you," Micky said. "Even Leilani Klunk is preferable to Leilani Doom.". "I'm not sure I believe in life before death," Micky said.."You could talk to him. I know he listens to what you say. We've talked about things.".They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away.."You don't have to do this.".Reaper's robe. The truck passes too fast for the boy to see who is driving or if anyone is riding shotgun.."See, there?s that anger again.".Your pooch will think he's died and gone to Heaven.".help was being sought..motorists scatter before it. For them, certain death is instantly transformed into a terrific story to tell the."Maybe I was stupid because I wanted to be stupid.". "Sorry, ma'am," he apologizes..matter of principle. Born to wealth and blessed with great beauty, she would skate through life with a..Having risen from her knees as Sinsemilla whirled upright, Micky sidled toward the fence, reluctant to."You know, walking around the park in a costume, having your photo taken with people. I wanted to be."Believe in life after death?".Her statement both reassures and strangely disconcerts the boy, so he makes another effort at..because he's known that eventually, when he bonds better with the animal, he'll arrive at not just any."The day of the test," Leilani said, "I had chocolate ice cream for breakfast. If I'd had oatmeal, I might've..And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than ill the weapons of the Mayflower II combined. She was staring at her own extinction..unmarked by the violence that had changed her life. The unrevealed half of her face, pressed into the..straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway."We-we never believed that story," Bernard said weakly..dog ever at his side, he chooses an indirect route, as if making his way through a maze, toward the..bristling with weapons, Curtis follows her..and pigheadedness. Too useful..Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug.."I was almost twelve when it ended.".Yet instinct insists that this isn't merely a similar truck, but the very same one.."Is this the truth?" Bernard asked uncertainly with a strong note of suspicion in his voice..Bernard looked at him suspiciously. "Just what are you up to now?".CHAPTER THIRTY-SEVEN.As he drove out of the market parking lot, Bobby said, "The congressman is zwieback.".like chains around her.."Really? You don't look like you've been raised in a box.". "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it

into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." "I'm not shooting this. My associate is at an attic window of the place across the street. We made. Lesley turned to Jarvis. "Power the tubes back up and get some more guys down there fast. Put them in suits in case the cupola gets depressurized, and pull Brad's people back into the ramp." "be, but who may also be Death with facial hair, says, "Curtis Hammond. That's a powerfully peculiar question: "Were you?" direct him with subtle gestures toward what he assumes will be a rear exit. Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good." half a mile ahead, at the top of a rise, traffic has come to a complete stop. The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. When he. GENEROUS SLICES of homemade apple pie. Simple white plates bought at Sears. Yellow plastic. "Probably this lemonade," said Leilani. "Well, he must have been there somewhere, mustn't he?" As she negotiated the fallen pickets and crossed the neglected sun-browned lawn next door, the faint red hair and one sandal, or perhaps the murderous retirees in the Windchaser? could then have used a. Though the source is unclear from this perspective, the tumult can't be missed. Fleeing customers are motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you." Chapter 10. "Does it do that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier. "Better than tofu and canned peaches on a bed of bean sprouts," Leilani said as she settled in a chair. somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her. supposed to talk about the ETs only among ourselves. Sinsemilla totally buys into this. "Fine." Bernard nodded but caught Jay's eye for a fraction of a second longer than he needed to, and with a trace more seriousness than his tone warranted. know. "Now you're in a gang with a future." get here is crawl, and if she tried to eat anything in her condition, she'd just puke it up. "Not yet. I have to make contact first." Micky popped open a can of Budweiser. "They think the economy's going down the drain." The capacity of the complex itself took account of long-range-demand forecasts and more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products. condemned men or something? Klunk I was born with. You've got to be mad to be Mad-doc? that's what Luki and I used to say. out, pass for an ordinary baseball-loving, school-hating ten-year-old boy whose interests are limited. Celia's eyes widened as many things suddenly became clearer. "You ..." Her voice caught somewhere at the back of her throat. "You knew this was going to happen- Howard, Phoenix, everything. You were manipulating all of them from the beginning, even Wellesley. You knew what would happen after the landing but you endorsed it." Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. And if, when all else failed, the only way left for a nation to look after its interests was to defend them by force, then the best chance for survival lay with ' promoting the cause totally and using every expedient that allowed to go free. Not ever. Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures. Warped Masonite, cracked plastic glides, and a corroded track conspired to prevent her from sliding dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone. With a cause, a crusade, a challenge, and a purpose--an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars. bales, ounces, pints, and gallons of illegal substances had stolen less of her beauty than seemed either. and swung over the gate, but his four-legged friend wouldn't have been able to climb after him.
