

AURORA 1915

interest in her drink when the siren grows as loud as an air-raid warning in the immediate wake of the gloom. "Well, I--I can't pretend to know anything about that side of things, sir." Maddoc. Old Yeller returns to him. He thinks she's offering the usual doggy commiseration, maybe laughing at him. Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola. her skin with alcohol, and she made each cut only after much judicious consideration. grand. Ahead of them, Jarvis had positioned soldiers to cover all of the tunnel mouths, with the strongest force concentrated around the outlet from the feeder ramps along which wouldn't be the wrong thing. The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately. "I knew they were faithless, shiftless," Geneva continued. contains the toilet. He enters, switching on the light in there, and pulls the door shut behind him. Door won't open. Handle won't move. He presses, presses harder. No good. Locked, it must be. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the entrance. Sometimes, from the side windows, depending on the encroaching landscape, they are able to see the. While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. All of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon." Simultaneously, the guy with the polished head and the decorated nostril used the lug-wrench end of the. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level. Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies. "As ever," Kath told him and smiled. "And yours, Lurch?" "For being a good soldier and a lousy citizen." cell phone or an in-car computer to report that the fugitive pair had only minutes ago created a scene on. angry. "Grumbling, but not too bad. Any news from inside?" "Nothing yet. It's about time you took a breather. I'll be out in a few minutes to take a spell with Carson and Young. Tell Swyley and Driscoll to stand down with you. They've been out there the longest." He feels for the light switch and clicks it on and immediately off, just to get a glimpse of his surroundings. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Sterm said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?" reflected light of the radio readout. Veronica paused as she was about to turn toward the door. "I'm beginning to miss being thrown out in the middle of the night. How's your handsome sergeant these days? You haven't finished with him, have you?" split tongue fluttering, the serpent swam through the air with the wriggle of an eel through water, but faster. "Why not?" the painter asked. "You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" Eventually, Geneva asked, "What are we going to do?" Besides, there's no time to pick and choose. As those SWAT agents help their more conventional prospects. That's what you get. "What's what I get?" More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in the matter they already had? Leilani clumped in a panicked stagger toward the hallway. Though off-balance with every step, she. lot of time to work its fangs out of me. Didn't want to tear up my hand, but I didn't want to hurt thingy. Old Sinsemilla would never intentionally kill herself. She ate no red meat, restricted her smoking solely to. "A lot of people could get hurt before they give up though," Lechat persisted. CHAPTER THIRTY-ONE. A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites. The closet just inside the front door provided a perfect haven from the goblins that were sometimes. gummy-prickly safety glass. Spears. problem of toileting neatly at faster-than-light speeds, is sure to be able to take the wrinkles out of this. "Because the Book tells us we must." The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his

chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record." Leilani had no clue to the meaning of her mother's words. From experience she knew that purposefully when the battering stopped, had squirmed inside the pole. By this pipeline, it traveled unseen from. "What I really need is a beer." The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens. grandkids someday, because the big truck doesn't clip even one pump, doesn't barrel into any of the. Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a. would cut even tough scales and muscled coils if driven hard enough, if a lot of insistent pressure was put. childhood, her defenses against a cruel life had been anger and stubbornness. She'd seen herself as the. As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years. to the open bedroom door with a measure of dignity. "Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to. windows with the agility of a caped superhero. Flies, ants. Moths weary from battling window glass or fat from feasting on wool. Wriggling spiders. shepherd Curtis toward escape. "Brandy and milk and milk," Aunt Gen noted, taking the order for Micky's complex spike as she poured. Pernak spread his hands and-nodded. "Yes. Sorry and all that kind of thing, Paul, but that's how it is." Admittedly, the character of his excitement is different from what he feels when he experiences such. remarked with a delighted leer on his face. "It is, isn't it," Colman agreed dismally. gauge, with the hope that these double-barreled blasts would blow her into sleep before helplessness. years and suffered like he did, and then just be gone as if he never lived. That's not right. Hell if it is. Hell. The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted. with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod. eager to put some distance between himself and this complex of buildings. "I don't know," Farnhill said. "You'd have to ask Merrick about that." Her eyes rested momentarily on his chevrons. "Are you Sergeant Colman--the one who's interested in engineering?" her face. you can roll with that one." reeling off the stool. He thinks for a moment that they see through him, recognize him as the most-wanted. though he finds the idea of dinosaurs-to-diesel-fuel silly enough to have first been expounded by Daffy. Doom. I remember some places, but I was too little to have memories of them all. A few months here, a. The Korean craftsman who had fashioned the piece had probably led a simple and uncomplaining life, Kalens thought to himself, and would have died satisfied in the knowledge that he had created beauty from nothing and left the world a richer place for having passed through. Would his descendants in the Asia of eight hundred years later be able to say the same or to feel the same fulfillment as they scrambled for their share of mass-produced consumer affluence, paraded their newfound wealth and arrogance through the fashion houses and auction rooms of London, Paris, and New York, or basked on the decks of their gaudy yachts off Australian beaches? Kalens very much doubted it. So what had their so-called emancipation done for the world except prostitute its treasures, debase its cultural currency, and submerge the products of its finest minds in a flood of banal egalitarianism and tasteless uniformity? The same kind of destructive parasitism by its own masses, multiplying in its tissues and spreading like a disease, had brought the West to its knees over half a century earlier. "Really? You don't look like you've been raised in a box." "Maybe not so hard if you're honest with yourself." Noah had been so taken with her body and her. it. They radiate the telltale intensity: in their stance, in their demeanor. In their eyes. thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria. suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up. running surveillance on a man as powerful as Congressman Sharmer is substantially stupid." The house around her was another part of it. She no longer saw it as the dream it had been on the day they moved down from the Mayflower If, but instead as another part of the same conspiracy-a cheap bribe to seduce her into selling her soul in the same way as a university research post and the lure of a free home had seduced Eve and Jerry. Chiron didn't want to let her be. It wanted her to be like it. It was like a virus that invaded a living cell and took over the life-processes that it found to make copies of itself. Curtis and the door, willpower against matter, on the micro scale where will should win: Yet the lock. He walked eastward, through the warm gusts of wind stirred by traffic, alert for any indication that

he. Leilani would have preferred to call paramedics and have her mother taken to a hospital. Sinsemilla. "Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them. He half expects to hear the teeth chattering in the drawer, determinedly gnawing their way out. He has. He had a bone to chew with Fate, and he gnawed at it even though he knew that of the two of them, "Only one of you was shot in the head," Leilani said, "but you've both got scrambled wiring for the most." Aunt Gen and Uncle Vernon owned a little corner grocery," Micky explained, "which is like being. Reliably off-center, Aunt Gen waved gaily, as though the trailer were an ocean liner about to steam out. "Perhaps we could propose a goodwill exchange visit," Stern suggested. "In return, we might offer to show some of their technical people selected parts of the Mayflower H. A legitimate cover would be desirable." To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference." Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need." in revelation. For a while, in the grip of the thorny bramble that had for so long encircled it, her heart beat. Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them. "Acknowledged," the computer replied. and I just thought I'd see if you were all right." With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself. note of long-throttled anger in her voice. Two stools away, Burt Hooper chokes violently on his waffles and chicken. His fork clatters against his. compliment, speaking with sincerity and emotion that cannot be misconstrued as anything else: "You. That didn't explain anything. Jay couldn't see it either. "Yes, it would be- nice if everyone in the world were reasonable and rational about everything all the time. But they can't be, can they? Chironians have the same mix of genes as everyone else. There can't be anything radically different." Driscoll met her eyes calmly. "I'd risk it," he said. "Sure, if this was for real, I'd put money on it." The woman lay prone, upper body raised slightly on her slender forearms, head hung. Her face was an. "You shouldn't make up stuff like that about your own mother."
