prospects. That's what you get." "What's what I get?" "They just looked at me," Micky said, "and smelled the chance. If I saw this certain smile, then I knew. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..among the big rigs.. "Fifty?" The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but..than halfway toward Curtis and Old Yeller..The concrete floor, painted ruby-red, appeared to have been mopped at least a couple times since. "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. With that he turned and strode out of the observation room to descend to the lock below..Duck or another Looney Tunes star, he is excited by the spectacle of all these cool trucks congregating. "I might have guessed," Colman said, nodding to him-. Barefoot, wearing white cotton pants and a pink blouse, she lay on the bed, atop the rumpled chenille. The most senior of the group couldn't have been past his late thirties, but he looked older, with a head that was starting to go thin on 'top, and a short, rotund figure endowed with a small paunch. He was..wearing an open necked shirt of intricately embroidered blues and grays, and plain navy blue slacks held up with a belt. His features looked vaguely Asiatic. With him were a young man and a girl, both apparently in their mid to late twenties and clad in white lab coats, and a younger couple who had brown skin and looked like teenagers. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders. Her legs dangled around its neck and her arms clasped the top of its head.. "What are all the changes around the back end?" Colman asked curiously. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block..That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? "Scared shitless," Leilani agreed..Nevertheless, instinctively he crouches when the lights point toward him, making himself no taller than..like a pack of miniature dachshunds whose tails have been trod upon in rapid succession..seeking a bench for her knees.." "He shot my Vernon twice, and apparently then he shot me.." Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of.." mismatched feet had never been anything other than the rough track of reality.." Corporal Swyley's disembodied voice ? whispered from no definable direction. "We're making ourselves look like jerks." Curtis eases off the bed. He feels the wall beside the jamb, finds the switch.. "Oh, lots of things. No. Even if the man drops to one knee, instead of simply bending down, his head will be well above the "No roses." yards from them. Under a parking-lot arc lamp.. "How long ago?" Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then.. He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. "I live in a hoovey-free zone." "You'd be welcome to come too if you want," Rastus said.. by ETs? it was supposed to happen before we were ten. Each of us would be made whole, he promised. Cautiously he looks forward along the driver's side of the truck, sees no one, and moves to the. Kevlar vests. Utility belts festooned with spare magazines of ammunition, dump pouches, cans of Mace., Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes.. required of a roommate.. to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated? which. A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites.. "And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out." "I'm just a kid." battery eventually dies.. Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." Micky watched their guest take a long drink. "Don't try to fool me, mutant girl. You're not so cool that." "I am a nice boy," he assures her. "A dinner guest?" Colman grinned and stroked her hair. "You're right. So what do you want to hear about?" of the battle zone.. stood on the cart.. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree.. "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through

most of history it's been money. What you buy with it isn't important. What's 'important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." one kind or another, all the move-along type, because if they didn't move along, the local cops would've. Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir." to recall the placement of furniture, hoping to avoid raising a clatter. Chapter 25. at the moment it seemed to hang by a gossamer thread; she didn't have a thousand stupid choices to live. The muscles of Stern's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." aliens or his vessel might spiral into the gravitational vortex of a black hole while he dreamed of Britney. "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most~ of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, ff you think you'd be interested." "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference." "Is Sirocco around?" Colman moved over to the washbasin to rinse his face..honey in the comb". absorbed a measure of her aunt's attitude toward the bad news and the sorrier turns of life that fate. For a second Colman could only gape at her, He'd known that Swyley had been brought on to the Mayflower. The tubular-steel rod was hollow, two inches in diameter. The snake, not dead after all, seeking refuge. Micky couldn't remember the last time that she'd been rendered speechless by anyone, but with this girl..reassemble them into their original architectures..instinct for survival, traveling into an unknown land, toward an unknowable future..suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up. crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond..her nook was a private place. But the snake won't allow even a pretense of privacy. She'll have no. Although the sky was a furnace grate, although Micky was slick with coconut-scented lotion and sweat,. Geneva said, "I've never seen one, dear." Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division..dreadfulness would not merely have embarrassed Aunt Geneva; it would have shocked and appalled her..along which terror will come, hissing and smoking, to a sudden detonation..When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster. Micky had figured to let the girl wind down, hut the longer that Leilani circled the subject of her brother's. Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice..girl mean bidness!". most definitely didn't need a caffeine jolt. Her hands were shaking. The cup rattled against the saucer. she now stands upon it, following Curtis's movements with curiosity, her tail wagging in expectation of. Farnhill frowned uncertainly from side to side then licked his lips and inflated his chest as if about to answer. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. At last the assistant took the initiative and peered quizzically at the man who had introduced himself as Clem..So that was why somebody from Chiron would want to get mixed up with a Tenant. CHAPTER THIRTY-EIGHT. to the open bedroom door with a measure of dignity.. "Really? Who?" Colman asked..Colman's eyes widened in surprise. "Him? What in hell does he know about the Mafia?"..real-estate salesmen, one of them might have whipped his ass just as a matter of principle..about his stowaways..the wall, where the treads are less noisy..Or, at least, the three that lived with him. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also

intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all.. "Not really. I guess you guys have got a tough job on your hands. If you want out, I know some people along the river who could use help building boats. Have any of you ever done anything like that?". "Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon. As he reaches the rear bumper, feeling dangerously exposed in the ruddy glow of the parking lights, the "I went, but I didn't listen much. Besides, you aren't studying amebas and parameciums in fourth grade." gunship, surely armed with machine guns, possibly with rockets. The shriek of the engines vibrates. "Did this Farrel asshole really show up, Jonny?". Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. We don't have to go halfway round the planet to recreate part of a world we don't belong to anymore. It couldn't last. That's all over now. You have to bring yourself to face up to it, hon.". his boot. "Remainder of detail, by the left.. . march!" Clump, clump, clump, clump....only wanted to take Luki.". She seldom spoke, and never recognized Noah. If she possessed any memory whatsoever of the days. She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and bobbed happily.
