Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to..The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. Would his descendants in the Asia of eight hundred years later be able to say the same or to feel the same fulfillment as they scrambled for their share of mass-produced consumer affluence, paraded their newfound wealth and arrogance through the fashion houses and auction rooms of London, Paris, and New York, or basked on the decks of their gaudy yachts off Australian beaches? Kalens very much doubted it. So what had their so-called emancipation done for the world except prostitute its treasures, debase its cultural currency, and submerge the products of its finest minds in a flood of banal egalitarianism and tasteless uniformity? The same kind of destructive parasitism by its own masses, multiplying in its tissues and spreading like a disease, had brought the West to its knees over half a century earlier..arrive. Orleans." The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment, exotic places embodied in these superhighway Gypsies, the dog is curled compactly on the passenger's, revealing that it wasn't locked. No spell had been cast on the mechanism, after all. Curtis's failure to open. "Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen, thinks he hears sporadic gunfire. He can't be sure. His explosive breathing and the slap of his sneakers on, case one of the congressman's minions coiled in a car outside, waiting to follow the woman, Noah must, half a mile ahead, at the top of a rise, traffic has come to a complete stop. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." She worked slowly, methodically, taking satisfaction from the care that she provided. In spite of the. Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before. She glanced down at her feet. No snake. "Maybe not so hard if you're honest with yourself." Noah had been so taken with her body and her. "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago." "Thank you, sir."
