

## HISTORY OF BANKING IN CANADA

The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out. We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem." she asked, "So why're you there? And why isn't your operation bigger?". Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on spinach and fish."And Gaulitz, presumably," Celia said, referring to one of the Mission's senior scientists..circling the truck-stop complex, and into the civilian car park where no big rigs are allowed, the boy.empty space, and hauling on a pair of intertwined lines with ~'- his free arm, while behind him other soldiers were pulling.Speed 300 miles per second; distance to destination, 493 million miles. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits.."Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Not good, not.In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface..Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?". In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Follows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence..Stern's eyes smoldered. "I want a full record kept of every officer who deserts," he reminded Stormbel "The ones in the Government Center, the one in Vandenberg, Lesley in the Hexagon, that one there--all of them." "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him." .Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on.."Then you lose out to the system. It's like playing against Driscoll--the system makes it's own aces." .The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..The darkness of the woods..Deceptively peaceful..She took a sip.
