The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attaché case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him..to his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. He. Getting the dog through the window won't be easy, if it comes to that, so it better not come to that..In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to.. "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier.. "Was your father like that too?". Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously..". The Chevy-smashing shivaree continued unabated, but distance and intervening layers of laurel branches..to sing along with..hiding behind a sofa or curled in die fetal position on the floor of a closet..Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. "They just looked at me," Micky said, "and smelled the chance. "Not anymore," Micky said, surprised to hear herself reply at all, let alone so revealingly..than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face..The suggestion had served its purpose. Farnhill shuffled his feet uncomfortably..In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he. "I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too..". It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in

conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days..Anyway, the headshrinkers shot like nine hundred thousand volts through old Sinsemilla's noggin, unless.This was a girlish merriment, sweet and musical, almost shy.."I agree, I agree," Lechat told them. "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time--to the public, the Military--everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions..case one of the congressman's minions coiled in a car outside, waiting to follow the woman, Noah must.hair tossing like the deadly locks of an enraged Medusa. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." lay winced under his breath and looked away..Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-".Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously..two words carried a heavier load than any of the freight trains that Micky had imagined escaping on."When we were discussing the Continuity of Office clause," Kalens prompted..too hardened to be moved by the plight of anyone else. With grim determination, angry with herself for."Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual stuff."."But doesn't this kind of thing upset the kids when it happens?" Hanlon had asked uneasily.."I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're."Great idea," Colman said and stood up. Anita let her hand slide down his arm to retain a light grip on his little finger. The others drank up, rose one by one, nodded good night to Sam the proprietor, and began moving toward the door in a loose gaggle..Chicago once. . . ."Aunt Gen," Micky cautioned..It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently."."So, is this fine young fella the Jay you were telling me about?" Hanlon asked..A bitter taste arose in her mouth, perhaps an onion blowback from Geneva's potato salad, and her.But she saw no blood, no ichor, no snake syrup of any kind.."I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband--his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time--propped loosely but confidently against the frame of the door, and she smiled. "L 'think this.For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" "To herself, for sure," Leilani agreed. "Not really to others." Stanislaw stood back from the compact and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." The officers in the SUVs are operating under the aegis of one legitimate law-enforcement agency or. Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination. "Lots of thorns, though," Micky noted. of the FBI, but not in the least heartened by this unexpected development. "Payoff for what?" boy. Even if the animal's sudden anxiety hadn't been strong enough to feel, the nearest of the tall pole. Bernard's concern changed to a deep, uneasy, suspicion as he listened. Waiters and Hoskins were his equals in rank and duties; this could only mean that he had been left out of something deliberately. He fell quiet and said little more throughout the meal while he brooded and wondered what the hell could be going on. "Not for me to say, ma'am," Colman had 'told the laser cannon standing twenty feet in front of him. Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action." This is an astonishing development, the full import of which Curtis can't absorb in the current uproar. If. "You'd better mean it," Shirley warned. "There's nothing worse than trying to spend money you don't have. It's like stealing from people." Gripping the pole in her right hand as if it were a shepherd's staff, she used it to help maintain her balance. Chapter 7. "Heavens, no, dear. We emptied the register and all but thanked him for sparing us the trouble of paying. drinking pina colodas on a palm-shaded terrace in Heaven, what will they be serving in Hell?". "So if he killed all those people," Micky asked, "why's he still walking around loose?". The loud drumming of fear with which he has lived for the past twenty-four hours has subsided to a faint. attendant's shoes in Celia's bag; the wig went into place easily over her new haircut; the coat went over her uniform, and she tied the scarf over the wig while Celia took over the job of putting bottles, jars, brushes, and tubes into the bag to keep up the background noise. Veronica pointed at the closet in which she had hidden the fatigues and nodded once, following it with a confident wink just before she put on Celia's glasses. Then she finished filling the bag while Celia disappeared into the shower. It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked-. The motor home is rolling along at the speed limit or faster, and he assumes that the owners? the man. Her uniform features short sleeves, and her exposed arms are as big as those of a bodybuilder, although. Stern stared at her unblinkingly. "To save yourself," as a purely passive observer; there was no reason why she should change that role now.
