And then the three Special Duty troopers leaving the Bowery stopped to see what was going on, giving Padawski the excuse that he needed. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. Outside, the three SD troopers turned away and moved slowly off.. properly coordinated.. You should take Hoskins with you. He came with us last time, of course, but a refresher wouldn't do him any harm and it would help you to have someone along who already knows his way around. That was really what I wanted to talk to you about." Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same time he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come.. grass that shimmers out there beyond the trees.. "A good try, Wellesley," Stern said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago.. "Pretty good. Aunt Gen was childless, not by choice. The love she'd never been. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. "I need more than a few right now. How much did your Navigator cost?" Noah asked.. "She's not in any condition to feed herself right now. I don't know anything about that.. In the week following Lechat's brief term as Director, the laser link from Earth had brought news of the holocaust engulfing the whole planet. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to.. "Does anyone else know about Howard?" Colman asked. "Veronica, for instance?.." "We lived in San Francisco then..". Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of..". "You think pretty smart..". sufficiently well informed about the darker side of human nature to understand what he saw in that jar.. And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--". Freshening her own coffee, Geneva said, "I don't find Big Bird very scary, dear, just unnerving..". The painter shrugged. "You just know. How do you know when you've had enough to eat?.." Clump-Clump!.." Sure..". Sirocco tossed up a gauntleted hand as if the answer were obvious. "Guys who don't like it but have to do it get mad. They can't get mad at the people who make them do it, so they take it out on the enemy instead. That's what makes them good. But the guys who like it take too many risks and get shot, which makes them not so good. It's logical..". "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that.. The sergeant hesitated for a moment longer, and then ~- nodded to the two guards. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn..It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked~.He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be.likely to gallop. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..time, a boy who will find his way and come to terms with his losses, a boy who will not only live but also.Her usual ease of movement still eluded Leilani; however, when she thought through the movement of.through their adversaries. Noah appreciated their professionalism,..mystery, and moment..fracturing it, and furrowed through her scalp.. "You know very well what I mean. Stop all this avoidance. Talk to me, deal with this situation..".Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted

to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over? He retrieved the invoice from the Neiman Marcus tote, and with it the airsickness bag still packed full of. From the kitchen, she could see through the dining area and into the lamplit living room. "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Sterm believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before. "I'm talking around?" "I agree," Marcia Quarrey said. She looked at Borftein. "If that's the case, then sending in the SD's would only confirm their fears. It would be the worst thing we could do." on his way to watch over? rather than torment? coal miners in deep dangerous tunnels. "I'm always working on a screenplay in my head. "Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . . just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door..scored six or eight points higher. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked..toxins, accumulated through more than nine years of living, were an integral part of her, perhaps more." "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's 'important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." Leilani wasn't able to act on her own good advice. Fear and anger prevented mind and body from being. "Okay, then what about human beings crossed with puppy dogs?" .wish that thou were as well made as she." Next, the man grins at his reflection. This is not an amusing grin. Even viewed in profile, it's an.out?" Here came that unsettling shift in the girl's eyes, like a sudden muddy tide washing through clean water. "He will. I'm stopping off at Jersey with Jay to see how his loco's coming along." "Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him.. "Your dad's a cop?" "We're not negotiating, Sherlock." "Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his hands on the heavy equipment there. A shuttle's on fire in one of the launch bays." "I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence.how to cope with that." "Ah, gee, I wouldn't take it personal," said the waitress. "Everybody's family's screwed up these days." Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola..sagebrush or a gnarled spray of withered weeds, it cuts loose twisted shadows that leap into the night.. "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislau could crash the protected sector of the public databank. Finally Jay said he

had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point..
