

## MEMOIRS OF THE LATE MRS ROBINSON VOL 2 OF 2 WRITTEN BY HERSELF

Jay frowned and looked mildly uncomfortable. "Sex?" he hazarded.. "And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs." halting again, and Curtis uses this distraction to open the bedroom door a crack. The lever-action handle. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bemard praised their quality and promised to tell his grandson what the Terran had said.. "Well, give us a call when you do, and we'll fix something up. I live in Franklin, so there shouldn't be too much of a problem. That's where we usually get together." "Say, half an hour?" "Where's Tony Driscoll tonight?" Paula asked, straightening up in her chair to scan the bar. "I don't see him around anywhere." Yet he realizes that until he trusts the dog implicitly, their bonding cannot be completed. Until then, they. "Everybody does." Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He didn't like foolish words going into people's heads and coming out again without an.~? thought about their meaning having transpired in between. Anita was an attractive girl, and not stupid. She didn't have to do things like that. Then it occurred to him that perhaps he was being too solemn. Hadn't he just done the same thing?. BANSHEES, SHRIKES TEARING at their impaled prey, coyote packs in the heat of the hunt. The Chironians were also experimenting with beaming' power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere.. "You know very well what I mean. Stop all this avoidance. Talk to me, deal with this situation." "Will do. See you in a few minutes." Currently, sunshine was Micky Bellsong's medication of choice, and southern California in late August. The capacity of the complex itself took account of long-range-demand forecasts and more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products.. "... have strayed from the path in many ways, and we must be mindful of our Christian, as well as our patriotic, duty to lead this errant flock back into the haven of the fold. Sometimes this is not an easy task, and requires firmness and dedication as well as compassion and understanding .... " Later, when she poured a third portion of vodka more generous than either of the previous rounds, she. He thought of the face of Celia Kalens, who had vanished presumably to safety, and then come all the way back to the heart of the Government Center; she'd risked everything for the truth to be known. Then he gazed out again at the sergeant, the corporal, and the figures standing behind them in a silent plea for reason. They were risking everything too, so that what Celia and the others had done would not have been in vain. Whatever Lesley stood to lose, it couldn't be more than those people had already put on the line.. "You want people to be afraid of you?" WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower if's Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions.. product secrets in return for a suitcase full of cash. Maybe it's just an ordinary screw-up." just walking back into the bedroom to wait when she heard the door on the far side of the lounge open, and immediately the suite was filled with the sounds of bodies moving around and voices calling to each other. A few seconds later Colman appeared in the doorway from the lounge. Celia started to move toward him instinctively, but he checked her by

throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass." In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away. The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--". Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse?". more, but Old Yeller doesn't return to her juice. Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." Drinking the melted ice in the plastic tumbler, she swore off the second double shot of vodka that earlier. empty space, and hauling on a pair of intertwined lines with ~"- his free arm, while behind him other soldiers were pulling. Five minutes later Swyley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Sterm gets in there it would give more protection to the rest of the ship." "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us?" / - . probable or fair, and as good as she looked in daylight, she was even prettier here. Although her bare. The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage. ever-dwindling but not yet eradicated capacity for romanticism. motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. Leilani wasn't able to act on her own good advice. Fear and anger prevented mind and body from being. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Sterm's

wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Fran?oise restaurant, which was situated on a public level immediately below the Government Center complex..Murmurs of surprise came from the screen. In the living room, the Chironians were staring at Celia in amazement. Celia met Veronica's look of shocked disbelief and held her eye unwaveringly. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously.
