"So they are," said Amos. "What do you make of that?". He moved down the line of bungalows silent as a shadow. He turned south when he reached the. I'm not disturbing you, am I? I heard the typewriter." The room was indeed identical to mine, though it looked a hundred per cent more livable. I couldn't put my finger on what he had done to it to make it that way. Maybe it was just the senudarkness. He had the curtains tightly closed and one lamp lit beside the typewriter.. "Then it said orlmnb, and mlpbgrm, and grublmeumplefrmp?. record it.. Crawford and Lang hung around as the scientists looked things over. They were not anxious to get. We were high now. Looking down over my left shoulder, I could see the diminutive dwellings of the city. Again those black and burning eyes of his seemed to absorb the Project from its bottommost brick to its topmost one. There was a purposefulness about his mien that had been lacking on his previous visit; a fierce, almost an awesome, determination that made him seem larger than life. His black eyebrows were like the wings of a hawk; his lips were set like bitumen. He was wearing a maroon turtleneck with a big N on the front, blue Levis and thick-soled chukka boots.. Amanda cried, "Matthew, don't?" Her eyes widened with horror. Her mouth moved again.. "What did you find this time, Harry? A nest of international spies or an invasion from Mars?" I guess Harry Spinner wasn't much use to anyone, not even himself, but I liked him. He'd helped me in a couple of cases, nosing around in places only the Harry Spinners of the world can nose around hi unnoticed. I was beginning to get the idea he was trying to play Doctor Watson to my Sherlock Holmes.. and before the next switchover he put his chair in the LOCK position. Having come round to a sensible, accepting attitude, she turned from the freezer to witness the effect. "I am very anxious to see you at the happiest moment of your life," said Amos. "But you still haven't. I had expected a more sympathetic reaction. I snapped, "You don't sound very sorry it happened." . The Project swayed, ever so slightly.

But that was all right. The engineers had allowed for the wind. I'd come hi the door, with prices the way they were and with no money coming in? I told her not to worry, "Now don't be sad," said Amos. "We need all our wits about us." and neither of the individuals in question was particularly bright. Bright people wouldn't be so quixotic, Fve got ten seconds to stare out at that vast crowd. Where, I wonder, did the arena logistics people scrape up almost a million in/out headbands? I was still there when Ike.The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all.* Hence angry readers can make the objection above, or add: "What is it a map of?"
