Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battledress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. If she stated.What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead..The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..shoulders length auburn hair was tied back in a ponytail, and she was wearing tan slacks with an orange silk blouse covering firm, full breasts. She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence..,"I love your nasty mouth."..makes her more difficult to kill than are ordinary mortals..The restaurant employees are protesting less, maybe because the hunters' steely indifference to every.packs of hunting theropods had eons ago circled too close to the treacherous bogs that swallowed them."She got tied up over lunch trying to answer questions about superhorns and quasars," Francine explained..to the pair of you. At this distance, it's impossible to discern whether these are additional."Oh, I see." "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble

Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion was a new one. "I'm not all that sure what you mean. The people who work here, I guess," took things from you that you never-ever wanted to give, the proper authorities weren't there for you. Dr. Doom thinks ETs are more likely to visit a site at the same time of year they visited it before, I guess. "When he has to explain where Luki's gone, what'll he say?" Geneva wondered. "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. At that moment the emergency tone sounded simultaneously from both their communicators, and warning--bleeps and wails went up from places in the labyrinth all around. They looked at each other for a second. The noise died away as Colman fished his unit froth his breast. The hunter has a handsome, potentially genial face. If she harbored anger, she hid it. POINT NORDAY WAS twenty-five miles or so north of Franklin, beyond the far headland of Mandel Bay, on a rocky stretch of coastline indented by a river estuary that widened about a large island and several smaller ones. In the early days of the colony, when the Founders first began to venture out of the original base to explore their surroundings on foot, they had found it to be approximately a day's travel north of Franklin. Hence its name. . . four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth--the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning. . . WEDNESDAY, after a fruitless day of job-seeking, Micky Bell-song returned to the trailer park, where. ISBN 0-553-80137-6. "Exactly right. So what do you want to hear about?" "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way." "The scabby little pervert can't even afford a real car." "Hey, don't get too excited about this," Colman cautioned. "I only said rd be interested in seeing it. The Army might have different ideas about me getting involved. THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of

the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. The target could only be the Kuan- y-- yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate.
