

MITTEE AS AUTHORIZED BY CHAPTER 479 OF THE LAWS OF 1894 TRANSMITTED

Dame Fortune had become so well-disposed to him that he got his third endorsement (though in point of hard fact, his second) the very next night. The fated encounter took place at Morone's One-Stop Shopping, a mom-and-pop mini-grocery on Sixth Ave. right next to the International Supermarket. Although Morone's charged more for most items, Barry preferred sbdpping there because it offered such a limited and unchallenging range of choices (cold meats, canned goods, beer, Nabisco cookies) that he never felt intimidated and ashamed of his selections at the check-out counter. He hated to cook, but was that any reason he should be made to feel inadequate? Morone's was made to order for people like Barry, of which there are great numbers..Baird Seartes.2. "YEAH!" from thousands of throats simultaneously.. After that day Lang was ruthless in gutting the old Podkayne. She supervised the ripping out of the use of cloning would be to reproduce genius. Amanda Gafl and Selene Randall came to Aventine during the autumn hiatus, when the last of the summer residents had gone back to jobs in the city or followed the sun south, and the winter influx of skiers and skaters was still some weeks away. Aventine scarcely noticed them, and if my current cohab had not gone off through the Diana Mountain Stargate on some interstellar artists' junket, they might never have been more than clients to me, either. There are nights I cannot sleep for wishing she had chosen another realty agent or come some other season. I was alone, though, in the boredom of autumn when Amanda walked into my office with her seeds of tragedy and elected me gardener. The leash broke. She bounded away down the sand. As though that were not release enough, she flung herself into a succession of cartwheels and forward flips. She went around a curve of the beach and out of sight, still cartwheeling. By the time I reached the curve, she had disappeared.. "Let's go over what we've learned. First, now that Lou's dead there's very little chance of ever lifting off. That is, unless Mary thinks she can absorb everything she needs to know about piloting the Podkayne from those printouts Weinstein sent down. How about it, Mary?" "If you don't mind, I prefer some formality. As my father says, this modern rush to intimacy promotes sex but prevents conversation and understanding." But not quite. He still had to get one more endorsement But now it seemed possible, likely, even. I try to change the subject. "Your father didn't come down to the first concert, did he? Is he coming. Martians. She consulted the pad, but I'd bet my last gumshoe she knew every word on it by heart "A Mrs. Carmichael called. Her French poodle has been kidnaped. She wants you to find her." Briefly, to answer other statements in the letters: I apologize for implying that Tolkien's hobbits and Ents (or his other bucolic-comic creations) are as empty-sublime as the Big People's heroics. But I agree (see question S) that Tolkien is a good, interesting, minor writer whose strong point is his paysages moralists. Ditto C S. Lewis, in bis Naraya books. As for other writers mentioned, only strong, selective blindness could miss the Vancian cynicism or the massive Dunsanian irony (sometimes spilling over into despair) which make their heroism far from simple or unquestioned-by-the-authors-them-selves. As for the others, I find them ghastly when uncorrected by i comedy, or satire (Morris, sometimes), or (in Beagle's case) the nostalgic wistfulness which belongs to fantasy per se rather than the ends of the console. That hardly seemed fan' to me. As though she read my mind, Selene said, "I didn't plan it; it just." You've heard of the long-period Martian seasonal theories? Well, part of it is more than a theory. The combination of the Martian polar inclination, the precessional cycle, and the eccentricity of the orbit produces seasons that are about twelve thousand years long. We're in the middle of winter, though we landed in the nominal 'summer/ It's been theorized that if there were any Martian life it would have adapted to these longer cycles. It

hibernates in spores during the cold cycle, when the water and carbon dioxide freeze out at the poles, then comes out when enough ice melts to permit biological processes.
