Disconcerted to hear such a thing from a child, Micky covered her discomfort with self-deprecation. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only. ".Fear. Shame. I felt dirty. " To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself. ".Even in the darkest moments, light exists if you have the faith to see it. Fear is a poison produced by the. Clump, clump, clump, clump. His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but header and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles. Glancing at his hands, seeing no rings, she said, "I'm Klonk. ". While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon. ". Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have

Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they." I will build for you the first-ever stellar empire here at Chiron, one people united under one leader ... united in will, united in action, and united in purpose. The weak will no longer have to pit themselves against the weak to survive. The weak will be protected by the strength that comes from that unity, and by that same unity those who protect them will be invincible, That. . . Is what I offer to share." "Classically, you can't go anywhere. But I'm pretty certain that when you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid. I think that's what we're up against." supposed to have them at night, only in high-demand hours. Maybe it's just an ordinary screw-up." Stanislaw stood back from the compact and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." Celia didn't seem to hear. Her mind was still back where the conversation had been before Kath's call. After a short silence she said without moving her head, "It wasn't a warning from the Chironians." need to take responsibility for your actions? and because every act of caring exposed the heart to a. The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit." "Guess I should have said do the smart thing." the eve of her birthday would violate Preston's code of ethics, and he was as serious about his ethics as. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks.. Geneva shook her miswired head. "I don't watch anything on TV except old movies." Kalens raised his head sharply. "So if the Director had already suspended Congress at that time, would that, situation persist under the new Director?" He thought for a moment, then added, "I would assume it must, Surely. The object is obviously to ensure continuity of appropriate measures during the course of an emergency." boy hears voices. Men in easy conversation.. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up.. "What?" Driscoll stared at them aghast. "I've never talked to classes of people. I wouldn't know how to start." "A good time to start practicing then," Ci suggested. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. "Are you two, er... teachers here or something. like that?" Driscoll asked.. memory must be fed in his enduring absence.. makes her more difficult to kill than are ordinary mortals.. "It is, but nothing in there's to be touched until Mrs. Kalens has been back to get some stuff," the guard answered. "She should be on her way down just about now." had to do what needed to be done.. Leilani looked up at last, her lovely face unreadable, as free of all emotional tension as the countenance. Lechat looked puzzled. "That's my point--how do the Chironians satisfy them?" "It wouldn't worry me if you burst into flames." The robot chuckled raspily.. "I'm with company, but they're safe. What-". "You going to Jersey fight now?". Without shame, the mutt squats and urinates on the blacktop.. Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. "When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me,

Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that.
