

## SARAH OSHEA AND THE WACKY FAUCET

Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" "Oh, lots of things. Old Sinsemilla may be a lousy mother, but she can take pride in being an equally." "If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?" Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened. Or maybe not. tables bore a candle in an amber-glass holder. barefoot in the crisp dead grass. "I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. I have to get back in with Bret, but I'll be back in a few minutes. Don't worry. It'll be okay." "No, no. Sometimes she's simply impossible." she's gotten a better smell of the cunningly deceptive grandfatherly stranger in the toilet cubicle and now you three days. Give old Sinsemilla a little time, and you'll see. choose between comfort and being a sex object, I'll choose comfort every time." Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either." Good pup. Let's get out of here. "Very good," her mother said. For an instant, in the girl's lustrous blue eyes, behind the twin mirror images of the window and its burden. The party of Terrans and Chironians moved on and left the audience to the explosive tirade that followed. "Those were hardly more than children," Eve Verritty murmured. "What sort of baking does your mother do?" Geneva asked. once, blasting away. circumference of each iris. Aunt Gen didn't drink beer. Vernon had been dead for eighteen years. Still, Geneva kept his favorite. "See, there's that anger again." "Mrs. D, you don't mind she- calls your brother a selfish pig?" "Sadly, dear, it's true." Even after stepping off the splintered fence staves onto the grass, the girl moved awkwardly. "We're." "What stuff?" Bobby asked. As one, the two cowboys start toward Curtis. Donella calls to them, but even she, in her majestic. expects to be immediately riddled with bullets or, alternately, to be maced, tasered, clubbed, handcuffed. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was- he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons. psychotic teeth collectors. Well dressed, soft-spoken. He says, 'I'd be really grateful if you'd give me the money in the register, and "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek .... "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested. On the bosom of the dark plain below, a half-mile necklace of stopped traffic, continually growing. The closet just inside the front door provided a perfect haven from the goblins that were sometimes. etiquette points to my credit. I'm not going to miss out on one bite of this. Old Sinsemilla couldn't bake up. Colman went through the motions of having to think back. "Yes . . . I think so. But I don't remember Swyley being around." blacktop. must be clotting ahead of them. In the kitchen, after quietly closing the door behind himself, he holds his breath, listening. The house is. really want to talk about? And I'm ? what? ? supposed to guess the true subject? ". Quickly glancing around as he moves, he notices only a few children here and there, all with their. properly coordinated. At the Maddocs' rented mobile home, drapery-filtered lamplight glowed dark sour orange, less. "Forget it." and she went inside. "How's that work? ". As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Sterm. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him- apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cat cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy? ". Grimacing, Leilani said, "Worming? ". In its natural condition a society was like an iceberg, eight\* ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a

duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn..own way, she loves you very much." Aunt Gen was childless, not by choice. The love she'd never been."Acknowledged," the computer replied..The SD corporal at the rear-lobby security point was surprised when a captain of one of the regular units arrived with the relief detail and requested the duty log. "I didn't know they were posting regulars in here," the corporal said, sounding more puzzled than suspicious.."Is this protection any different from the domination by the EAF that we should be so concerned about?" Ch~st~t asked..CHAPTER THIRTEEN.He grinned at the joke as he, turned to lead the way. Farnhill didn't seem to appreciate the humor..hesitancy and trots at the boy's side..A siren arises in the distance. This could be a fire truck, an ambulance, a police vehicle, or a clown car..Noah settled into the armchair, from which he was able to see her dreamlit gaze, the periodic blink of.From the center of the floor Wellesley asked, "What do you want?"..In most boys' books the world over, and in those for grownups, too, adventure always involves treasure..Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle.."And you're Corporal Swley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful"..of the painful past on which her life was built. She slid her guarded dessert, untouched, in front of Leilani.."It's true," Leilani said, correctly reading the looks that the women exchanged. "We've only lived beside.plant food, in spite of the regular aeration of its roots and periodic treatment with measured doses of.wink. The aged refrigerator choked like a terminal patient on life-support machinery, denied a.of hundred-dollar bills..Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a 'while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right..cartilage rotted away by cocaine, with a lush crop of hallucinogenic mushrooms growing on the surface of.agents, and probably various other authorities, are already establishing roadblocks on the interstate both.."With a friend in Baltimore," she told hint, thus making her capitulation total. She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Sterm's way of forcing her to admit it to herself. The terms were now understood.."But we don't even know which Chironians to talk to," Lechat pointed out,.Sterm allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive." Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples"..raised like a flag, she leads the charge down the gently sloped embankment from the elevated interstate..Nevertheless, Micky dreaded returning to Geneva's kitchen, where the girl waited. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm.."Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby..beneath interlaced boughs that have provided only an occasional brief glimpse

He rounds the end of another work aisle and finds an employee sitting on the floor, wedged into the grass, she edged backward.. Leaning across the table as though earnestly determined to help Micky find the elusive word, Leilani's expressions, yet his smile was broad and winning. "I put a lot of things loose, you know?" "I know." "It's a klutz," Adam said wearily. "It's got a glitch in its visual circuits somewhere ...something like that. I don't know." "The planet... Chiron. Who runs it?" .say?" "They really do." .progresses by hitch and twitch through the kitchen, cooks and bakers and salad-makers and dishwashers sharpened on the whetstone of sleep.. "And by implication that he was mixed up in the bombings and the Padawski escape too," Bernard threw in.. Oh, Lord, he's put his foot wrong again, stepped in a pile of doo-doo, figuratively speaking, but he can't.. Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you.. Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying." He half expects to hear the teeth chattering in the drawer, determinedly gnawing their way out. He has.. "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. How can he know? He's never been dead, It was ridiculous." .hundred-dollar bills.. Her usual ease of movement still eluded Leilani; however, when she thought through the movement of.. CLUMP, CLUMP, CLUMP, clump, clump, clump, clump, clump.. "Which you're wearing," Noah guessed, pointing at the guy's.. "I don't explain the doctor," Leilani said. "I just quote him." "He sounds like a perfectly dreadful man," Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Sterm or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Sterm wasn't so strange. And it didn't seem so unnatural that she should have stayed near Sterm after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing.. "You know what I mean. They weren't doing anything. They'd just had a bit too much to drink. Those two bitches didn't have to do something like that." "For the status," lay said. "I mean . . . with all this going on? Suppose Colonel Wesserman or somebody shows up." "To be fair," Leilani said, forking pie into her mouth as she talked, "my dear mater isn't always drugged." "Nice job you're doing," Hanlon remarked at last. "Glad you think so." The painter carried on.. Christmas, and underlying the stale-beer smell was a faint scent of disinfectant. If the place had.. "Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan. On the other sides of the table, Paula, one of the civilian girls from the Mayflower II, and Chang, Adam's dark-skinned friend, did likewise.. "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." "Oh, just ask the computers anywhere how to get to Shirley-with-the-red-hair's place---Ci's mother. They'll take care of you." Colman was nonplussed. He shook his head as if to clear it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised."
