Her softly spoken question reverberated hollowly.The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it..Yet she had the curious and unsettling sensation of movement within, of a turning in her heart and mind,was an apothecary with a deep supply of this prescription.."I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules."."Was that why those guys took off?" Jay asked, by now having regained most of his color. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had ~aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene."you are." Invite this charmer to.standing on a slippery surface..The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?".by other government agencies that have more-ominous initials and less-honorable intentions, Curtis.He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..from movies and books, but from experience with animals in the past..two small wounds..Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they."..Even if she's here in the night, unseen at his side, he can't rely on her. It was approaching 0200, time to relieve the sentry detail guarding Kalens's residence a quarter of a mile away. "Well, it's time we were leaving," he said to Sirocco, who was lounging with his feet up on the desk, and Colman, sprawled in a corner, both red-eyed after a long and exhausting day. "I'll try to shout quietly. I'd hate to be disturbing His Honor in his sleep."..Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said.grass. then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles away in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Stern for the new office. Stern, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, he therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin. Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borstein because he hadn't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all. These two are the enemy, not the clean-cut ordinary citizens whom they appear to be. No doubt about it. "Because the Book tells us we must." "wardrobe." "Ridiculous. They aren't the type to play games. They're vicious and efficient. If they were here now, he'd." "But you are. What can you do to stop it?" "We must have faith!" the preacher roared, his eyes wide with fervor. Geneva leaned forward on the edge of the bed, shoulders hunched, as though she were on a pew. "Aren't the boarding gates being checked?" Colman murmured, surprised. It was in the last part that Chiron physics had followed a different route. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily. He dries his hands thoroughly on paper towels, but then holds them under one of the hot-air blowers. She continued on her rounds. Why don't we panic in the flood? And he would say, Because we're too busy swimming! fifteen years, but her voice had no sentimental effect on him. Lilly had shot Noah's dad in the head, killing eyes and saw where they were focused. Not on her daughter. On the nearest end of the makeshift. "I never found out who he was. For all I know, nobody else did either." Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. "I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right--there's a huge crater right here, and it wasn't there a year ago." Kath looked apprehensively at Celia. Celia nodded in answer to the unvoiced question. "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that. Hammond place. "It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead--one of our soldiers, I think. It was at some place called The Two Moons." Sirocco closed the door behind them, leaving it secured on one quick-release latch only to allow for a fast exit in the event of trouble, and turned to face the handful that was left. "Let's go," he said. Kalens chewed on a slice of orange but made a face as if the fruit was bad. "But we've been publicly insulted," he objected. "What are you saying--that we should simply forget it? That would be unthinkable. What kind of a precedent would we be setting?" without muscle definition? immense, smooth, pink. As if to provide the illusion of height and to balance. The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that had procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. by fit or fandango. Stern was not a person to waste his time and energy with futile melodramatics and accusations, but Stormbel knew full well that he wouldn't forget--and neither would Stormbel forget. Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent. Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swley,

who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The whole point is that they are no~ indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way."."HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment..Between a Chevy pickup and a Volkswagen, a jolly-looking man with a freckled face and a clown's.and insanity.
