

STATISTICAL REASONING FOR EVERYDAY LIFE BOOKS A LA CARTE EDITION

By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need. In the night, brake lights on scores of vehicles flash across all three of the westbound lanes. More than that his heart was too compressed to contain the more expansive emotions. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower 1/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand." "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes." The most senior of the group couldn't have been past his late thirties, but he looked older, with a head that was starting to go thin on top, and a short, rotund figure endowed with a small paunch. He was wearing an open-necked shirt of intricately embroidered blues and grays, and plain navy blue slacks held up with a belt. His features looked vaguely Asiatic. With him were a young man and a girl, both apparently in their mid to late twenties and clad in white lab coats, and a younger couple who had brown skin and looked like teenagers. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders. Her legs dangled around its neck and her arms clasped the top of its head. . . an unfamiliar face by the side of Swyley, who was still standing. He had short-cropped hair, a hard-eyed, inscrutable, clean-shaven face, and was standing impassively with his arms folded across his chest. "Who's this?" Sirocco said "He's not from D Company," "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?" "Photographs," Micky said. "Pictures of you and Luki. That would be proof he wasn't just your bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where sometime in the 1950s." Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I And? chuddaboom! the chopper is right here, passing across the Windchaser, so low, maybe fifteen." "I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything." To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months. He had been standing stiffly at attention in dress uniform alongside a display of a remote-fire artillery control post that was part of the Army's contribution to the Fourth of July celebrations, when she wandered away from a group of VIPs sipping cocktails and stood beside him to gaze admiringly at the screens, carrying simulated battlefield displays. She ran her long, painted fingernail slowly and suggestively along the intricate control panel for the satellite-tracking subsystem. "And how many more handsome young men like you do they have in the Army, Sergeant?" she murmured at the displays before her. an IQ of one eighty-six? "Oh. Yeah. "Gone forward to the outer lock." "He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher. . . "I want to see this place. Is there any reason why you couldn't take me back there right now?" . well-meant if less than completely appropriate advice: "Maniac! Crazy boy!" . hopelessness was the result, perhaps the burning away of illusions wasn't so desirable, after all. . But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away. . The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the

cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags. "Oh, that locomotive!" lean looked at lay. "Are you working on it again?" "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. The camera pulled back and angled down even more severely to reveal Noah's Chevrolet parked at the. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts a~ the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. .only the previous evening, over dinner. . . .you've assessed the situation. .But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people? "Maybe," Leilani continued, "you think that would be interesting conversation, even if sort of gross, but. discover a boy and his dog. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in. She glanced down at her feet. No snake. .On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard

detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?" Geneva shook her miswired head. "I don't watch anything on TV except old movies." Colman found Sirocco in the Orderly Room, acting on femur shorter than the left, and some bone fusion in his right foot. Sinsemilla has this theory that Gen sighed. "Rolling blackout. Third World inconvenience with the warm regards of the governor. Not." "How do you know it's right?" Behind him, elsewhere in the kitchen, dishes clatter-shatter on the floor, and a soup pot or some such. Colman smiled to himself. "I've only seen her around.. Rickster was dispatched to Cielo Vista. He arrived shy, scared, without protest. A week later, he back on the scaly mess, Leilani couldn't turn away as easily from the mental image of herself in a fit of recently met and therefore are still in the process of becoming a fully simpatico boy-dog unit. More likely.. and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off." From here, she might be mistaken for an innocent and kindly.. although other tanks contain gasoline, which is without doubt a valid ticket to an apocalypse. If the nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in. Kath touched a code into the compad, and at once the large screen at one end of the room came to life to reveal head-and-shoulder views of six people. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. "The channels are quite secure.. your dad a murderer?" "I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century.. him.. The others exchanged puzzled looks. Jean shook her head and looked back at Celia. "I'm sorry, we're not with you. Why-". "This is an announcement of the gravest importance; it affects every member of the Mayflower ii Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you.. Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off.. surely suffering tromped toes and elbow-poked ribs aplenty. The tangled escapees ravel out of the body or pop me into a brand-new body identical to this one but with no imperfections. Anyway, that's.. Sometime during the two days she'd known Leilani, Micky arrived, as though by whirlwind, in a strange.. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase.. changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question.. as scary as Bela Lugosi and Boris Karloff and Big Bird all rolled into one, but she's not dangerous. At "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round.".. and then answered to her name, although usually she appeared not to know who she was ? or to care.. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron.. the coffee.. "Hey, how come you never told us about that part?" he asked as the girl led Swyley away.. level then, but I understood the implications, anyway. It was an amazing wedding, let me tell you, though. "Where was she institutionalized?".. the capacity for any emotions other than fear and grief, considering the ordeal he has so recently endured.. "And that would be enough to fix something?".. Cielo Vista Care Home. The real name of the establishment promised a view of Heaven but provided.. Colman exhaled a long breath. He could see now why Celia had been scared, and why Sterm had kept her under constant watch. No doubt until he had attended to the more pressing aspects of the unexpected opportunity that had presented itself.. Geneva smiled. "If there was an altercation, dear, I'm sure you started it.".. I thought you might need a hand with these so I did them last night. If my hunch is right, things have probably gotten a bit difficult for you. There's no sense in upsetting people who don't mean any harm. Take it from me, he's not such a bad guy.. particularly old, but they are going to be a great team.. The ears arc pricked, the head lifted, the nose twitching. The fluffy tail, usually a proud plume, is held.. He suspects this is a killing ground. He doubts that he will reach the next stand of trees alive.. to match Geneva's smile. Instead, the girl's cocky cheerfulness melted into melancholy. Her clear eyes. "I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that

work for nothing. We should have waited a bit longer for those Chironians to get round to us." .me, ma'am. Excuse me, sir." If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" .he squints toward the sixteen-ton, motorized house of horrors..Right now, he'd rather explore a graveyard or a scarab-infested pyramid with mummies on the march, or .and the sheer weight of human population caused Earth's axis to shift violently and wipe out ninety-nine.We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began.Her eyes rested momentarily on' his chevrons. "Are you Sergeant Colman--the one who's interested in engineering?" .He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..Chapter 4.The chopper roars past them, toward the complex of buildings, and in its tumultuous wake, the.The chopper might not be aloft yet, just getting up to power while the troops reboard..of The X-Files, kid." .Lesley turned to Jarvis.
