

TAKING JESUS TO COURT

"I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." . . . few there. Clump, clump, clump, clump....Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".rolling through her in nauseating waves.. "That's a gamble we'll have to take," Sirocco said. Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?". "maybe you'll realize your palm-shaded terrace isn't in Heaven." . . . "Do you?". recognizes him for the monster that he is. Whether the psychic wire or a good nose is responsible, she. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." . . . or in fear. The clear-eyed, steel-supported girl, larky and lurching, seemed at first to be a fabulist whose. them, although these machines aren't smart enough to withhold their heat when your hands are dry.. "Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia." . . . Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his. "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but. "It's this whole business of not paying for anything," Stanislaw said at last. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It seemed too good to be true at first, but that soon wears off. It's not funny anymore, chief. It's getting to all of u~'. clatter and a fine mournful whistle..holes. Lilly had shot Noah's dad in the head, killing. "You could talk to him. I know he listens to what you say. We've talked about things." . . . Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." . . . Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed.. "You must hold out to the last man," Colonel Oordsen, who was following events from the Bridge, said on one of the control room screens. "We're almost ready to detach the module." . . . "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and

disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and we just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?".what was happening. I tried to go along with them, but he ... Preston wouldn't let me. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..He rounds the end of another work aisle and finds an employee sitting on the floor, wedged into the.Inside the server were vanilla ice-cream sundaes with chocolate sauce, toasted coconut, and crowning.Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it..The specificity of the answer was disconcerting. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the

The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork-was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek."You know what I mean. They weren't doing anything. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..".She's a good-looking girl. Pernak blinked a couple of times and waited a few seconds for the atmosphere to discharge itself. "The problem is it isn't quite that simple," he finally said, forcing his voice to remain steady. "If everybody was

going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. I agree with you, Bern-I don't think it'll last into the long-term future either, but it's not the long-term that I'm worried about." He glanced at Jean apologetically.
