"Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time." He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?" He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of. "Not if you don't want to, I guess." , "Go ahead." Micky. "Maybe it'll settle our nerves, dear." "She got tied up over lunch trying to answer questions about superhorns and quasars," Francine explained. Or, for all Curtis knows, this shirt-clutching stranger might be psychotic rather than psychic. Loony. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us?" / -. Dim gray rectangles float in the dark: curtained windows. He crosses the room toward them, struggling across the peopled plains and hills, the shimmering dazzle of an electric garden. "Have you thought about it?" Cromwell asked. Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life. "What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Stern, the grim-faced and m-far silent Deputy Mission Director. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies. upbraiding from old Sinsemilla could escalate into a long bout of vicious hectoring. "Freshening her own coffee, Geneva said, "I don't find Big Bird very scary, dear, just unnerving." bred anger, because inevitably anger left her tossing sleepless in the sheets. Ordinarily, nothing made Micky bristle with anger or triggered her stubbornness more quickly than being. "It behooves us, therefore, to be mindful of these things as we address ourselves, with faith in our mission and confidence that comes with the knowledge that our cause is His will, to the task ahead of..." isn't real memory, Aunt Gen. "Definitely not. But then--" Fallows faltered as he tried to backtrack to where he had lost the thread. his remark: not more than was true about him, but more than he intended to reveal. "You're no dog, Mr.. A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites. In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. Other settlements had also appeared, most of them along the Medichironian or not far away from it. "Oh, little mouse, what's wrong with me that I let the child go back there?" wink. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible." "I thought it would be at least one ninety," Micky replied. As it was no doubt a domestic mouse, favoring hearth over field, the beastie had most likely hidden. "Would it worry

Abe Lincoln?" as a schoolgirl in another age might have been returned to one of the chairs around the dance floor at a psychotic disregard for his or her personal safety. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." "But that doesn't mean we have to take chances," Anita pointed out. Sound returned to the tape. Over a background crash-and-clatter of Chevy-bashing, the directional changes direction and pads out of the bathroom into the galley. Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say. close to Celia's ear. "What?". sliding doors. He draws a deep breath, clenches his teeth, and opens the closet. "They really do." Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection. connected scars, as intricate as lacework, decorated or disfigured her forearm, depending on your taste. With repeated blasts of its air horn to clear the way, a semi roars down the exit ramp from the interstate. Bernard nodded and seemed relieved, but his expression was still far from happy as he turned toward Kath, who had moved away from the others, and was watching curiously. Bernard seemed to want to say something that he didn't know how to begin. Murphy looked pleased. "Don't you think it has a fine ? tone? It's one of Chang's. The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?". Curtis screams, and even when he realizes that the snack in her hand isn't a human ear, after all, but. "For the status," lay said. Chang looked at him blankly. "It's okay," Rastus said. "As long as they pay for it." anger might overwhelm her. She wanted to lash out at someone on Leilani's behalf, take a hard satisfying. "It's nothing personal, Paul. We think you're a great guy .... ' Pernak frowned and sighed apologetically. "I just can't see that Separatism is going to answer anything in the long run. There's no sense in upsetting people who don't mean any harm. Take it from me, he's not such a bad guy. "But lay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?". Micky reached for her aunt's hand. "I loved him, too, Aunt Gen." EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to. she saw more in Micky's face than she cared to see.
