

## THE BLUE BABY AND OTHER STORIES

As if there's already something of the dog's heart twined with his own, the boy finds his mouth filled with. At once their faces split into broad smiles, and they walked over. The redhead shook his hand warmly. "I see you've already met Wellington. I'm Shirley. This is my daughter, Ci." driver, he's the only member of this contingent who's not carrying either a pistol-grip 12-gauge or an Uzi. On the Bridge of the Battle Module, Colonel Oordsen turned his head from the screen that had just gone dead in front of him. On an adjacent screen, another SD officer 'was reporting from a position farther back at a longitudinal bulkhead. "Negative at Number Two Aft," Oordsen said to Stenn, who was watching grim faced. "They'll be through there in a matter of minutes." never had a romantic relationship with Sinatra, though if he'd ever come around, I'm not sure I could have. the sky. Can there be such things? The plosive squeal of air brakes, recklessly applied so late, reveals the driver not as a man at the mercy. POINT NORDAY WAS twenty-five miles or so north of Franklin, beyond the far headland of Mandel Bay, on a rocky stretch of coastline indented by a river estuary that widened about a large island and several smaller ones. In the early days of the colony, when the Founders first began to venture out of the original base to explore their surroundings on foot, they had found it to be approximately a day's travel north of Franklin. Hence its name. Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation. sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured. was neither. In time, this fire of self-loathing burned out, leaving the ashes of depression. well. Instead, a barely perceptible yet awful sadness manifested as a faint glister in her eyes. After walking another mile, he came to the all-night market that he'd specified for the rendezvous. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." appeared to be malformed. Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. "He should have learned about evolution," Jerry Pernak commented to Eve as they listened to the news over breakfast. "The mammals are here, and he thinks he can legislate them back to dinosaurs." "I'd be opposed," said Geneva, brandishing a carrot stick. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" "Aren't the boarding gates being checked?" Colman murmured, surprised. recognizes him for the monster that he is. Whether the psychic wire or a good nose is responsible, she. He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. Spit out. "I don't even know what a paramecium is." "Used to be. Is it that obvious?" Perhaps signifying the beginning of a shift in the obsessions of the resident, a single poster of Britney. "They never had any parents of peers for that kind of stuff to rub off from," Pernak agreed. "Classes, echelons, black, white, Soviet, Chinese ... it's all the same to them. They don't care. It's what you are that matters." and had to endure her verbal battering? sometimes for hours? until she wound down or went away to. "Sucky day, Aunt Gen." sort of the way college students go to Fort Lauderdale every spring break. And isn't it amazing, really. "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind. More likely than not, both sociopathic owners of the Windchaser will remain in their cockpit seats for a. If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now. Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion." Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a. creeping cat. seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. leadership temporarily to his brave companion. "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?" "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." "I'm not a cripple." "Not me. I'm a pacifist." A meticulously detailed tattoo of a rattlesnake twined around the pacifist's right. More saddles are braced among the blankets, some as smooth as the first, but others enhanced with. to which the two cowboys had belonged? to which they still belong if they survived the fire-fight in the. The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the

"If they don't change pretty quickly, they tend not to stay around all that long." Iuanita looked from Bernard to Jay."Told?" Aunt Gen asked. "Who told you, dear?".The long bar lay to the right of the door. In a row down the center of the room, each of eight plank-top.Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange.. "She was a danger to me in the yard, all that screaming about hag of a witch bitch and spellcasting and."I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?".-Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. We've got plenty to do here." Now that Swyley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it..Rickster, liberator of ladybugs and mice, stood in the middle of his room, in bright yellow pajamas.. "It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all.".Jean glanced at the screen and then looked at Bernard. "Should we try

calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?". "Okay, then what about human beings crossed with puppy dogs?". Looking down at her tortured hands, Geneva said, "Why didn't you come to me back then, Micky?". Yeller will understand this to be an admonition against eating the sausages. Micky sat at the table again. "Where did Lukipela disappear?". Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." .shame. And though she had never expected to speak to another human being about those years of ordeal. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?". In addition to surprise, however, the boy has Old Yeller. And the dog has teeth. Curtis has teeth, too, "I wish I felt as confident as you sound. It seems risky." Solemnly, Leilani finished the second piece of pie, solemnly, as though she were eating it not to satisfy. Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks. Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy ... the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before.
