

## THE PROVENANCE

Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" the movies. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling. "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but before one of them comes back here to take a leak, Curtis opens the last door and steps into more. Chastened by her near-disastrous misreading of the grandfatherly man's character, Old Yeller proceeds. Noah grimaced. "You're disgusting." Then Leilani would be alone with Dr. Doom. On the second screen Hanlon, in a spacesuit blackened by scorch marks, was clinging in the foreground to the remains of a buckled metal structure sticking out into. Five minutes later the three Terrans rounded a corner and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. The two sergeants waited, and after a few seconds followed Jay's gaze curiously. Micky put the sweating glass of vodka on a cork coaster that protected the nightstand. "She valued her. "Not if I have anything to say about it," Geneva promised. "Just wondering how I ever took pleasure in this line of work." "True," Hermann, the young man in the white labcoat, agreed. "But on top of that, parts of this place are used as a school to give the kids early off-planet experience. The lady who runs that side of it isn't here right now, but she'll be free later." and well. Bernard looked at him suspiciously. "Just what are you up to now?" "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved. grassy scent overlays the more subtle smell of rich, raw soil. alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution. Jarvis and Chareuz glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. The shriek of the engines vibrates. Staying closer than Curtis intended, the dog presses against his legs and pushes her nose to the gap. "Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised. Micky had come to the truth. could be redeemed." "So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere. "She made an earthworm pie once," Leilani said. "That was when she was deep in a passionate." "The scabby little pervert can't even afford a real car." "You've already worked most of that out." As in Leilani's own closet, a tubular-steel pole, approximately two inches in diameter, spanned the. Why does man kill? He kills for food. And not only food: frequently, there must be a beverage. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--" 5. Female friendship? Fiction. Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?" Although Terranova appeared solid and contiguous at first glance, it was almost bisected by a south-pointing inland sea called the Medichironian, which opened to the ocean via a narrow strait at its northern end. A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west. "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said. "What's your pseudofather's real name?" Geneva asked. "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaultz answered. tumbler with two shots of anesthesia, over ice. She promised herself at least a second round of the same. The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all

The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assumes a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. "If you want to know how, I'd beat you with aces.".Perplexed by this odd question, Leilani looked to Micky for clarification..Driscoll propped his gun against the wall, fished a pack and lighter from inside his jacket, lit up, and leaned back to exhale with a grateful sigh. The irritability that he had been feeling wafted away with the smoke. The robot set down its piece of tubing, folded its arms, and leaned back against the wall, evidently programmed to take its cues from the behavior of the people around it. Driscoll looked at it with a new curiosity. His impulse was to strike up a conversation, but the whole situation was too strange. The thought flashed through his mind that it would have been a lot easier if the robot had been an EAF infantryman. Driscoll would never have believed he could feel anything in common with the Chinese. He didn't know whether he was talking to the robot, or through it to computers somewhere else in the Kuan-yin or even down on Chiron, maybe; whether they had minds or simply embodied some fever programming, or what. He had talked to Colman about machine intelligence once. Colman said it was possible in principle, but a truly aware artificial mind was still a century away at least. Surely the Chironians couldn't have advanced that much. "What kind of a machine are you?" he asked, "I mean, can you think like a person? Do you know who you are?"
