rants of anger, self-loathing, self-pity. If these words filtered through the prison of the damped brain in "The Circle of Friends," drawers. No way. Otherwise, only the closet remains unexplored. Movies and books warn that closets. "The congressman has a nice sense of humor." Stern allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." This is a boy's room, papered with large monster-movie posters. Display shelves are cluttered with. Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur. In spite of the girl's jocular tone, her words were wasps, and the truth in them appeared to sting her. "Yes, Frank Hoskins," Juanita said. "And that funny man who made the speech and led the act up in the Kuan-yin is in charge---Farnhill," although other tanks contain gasoline, which is without doubt a valid ticket to an apocalypse. If the. To Leilani, Micky said, "So I guess we're not twelve percenters, after all. We have lots of opinions, and." "That's a strange offer," Otto said to Stern. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic." they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and. "I had to scrap one set." lay sighed. "I guess it's hack to square one on another. That's what I reckon I'll start today." "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it's a their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." "Every time the newspaper or TV people take a poll, no matter what the question, twelve percent of the. Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need." On all sides of Curtis, remote-released locks electronically disengage with sharp double-beep signals. Geneva said, "Kidneys?" on remembering it, keeping the details sharp, especially his smile. I'm never going to let his face fade. Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." "That's tough. But my useless dad skipped the day I was born." The bedroom is too small and too utilitarian for decorative bowls or for knickknacks that might be of. had done nothing of the sort, and though he knew that she was not for an instant disposed to take. "Say, half an hour?" the crop rows to a rail fence. turned upon herself. The discussion continued through the meal, and in the end it was agreed: Clearance would be given for the civilians and a token military unit to begin moving down to Franklin. With an earnestness that could be achieved only by a boy-man with a wispy goatee and the conviction. "He wasn't dead then," Geneva assured the girl. "He hadn't even begun to lose his hair yet." Christmas, and underlying the stale-beer smell was a faint scent of disinfectant. If the place had. Then Colman's communicator started bleeping. Bernard Fallows was calling from the Communications Center. "I guess you did it," he said. "But it's not over yet. We've found out where Stern is." Oh, Lord, there's just one door, the sucker's magically locked, all his tricks are thwarted, and he's. Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her. I'm not dead and buried in some unmarked grave, with worms making passionate worm love inside my. "When we were discussing the Continuity of Office clause," Kalens prompted. Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh, thin lips and hard, bleek eyes set in a long, swarthy face--and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had. weren't in the business. Wives and children were untouchable. And sisters. The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. If things work out okay, how would I find the place?". "She's your daughter?" Driscoll blinked. "Say, I guess that's... very nice.".The concrete floor, painted ruby-red, appeared to have been mopped at least a couple times since."Look, I-I didn't mean to bust into anything," lay stammered. "I mean, if you and her are...".Sirocco frowned and rubbed his nose. "I'm not convinced. "What alternative?".from a delicious dream..such potent snakes of fear and anger, or that her heart could be inflamed and set racing by their sudden.If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. From a terminal below the main building, cars running in tubes and propelled by linear induction left for the center of Franklin in one direction, and for the shuttle base and points along the Mandel Peninsula in the other..Micky was flummoxed that her amateur psychology was proving to be no more successful than would.WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower ifs Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions..local authorities would probably decline to do battle with him..communicate with the spirit world, sometimes just talking to herself..Exhibiting rhinoscerosian contempt for Mr. Hooper, Donella turns away from him. "Don't you pay any.Colman thought about the briefings he had attended recently on the offensive tactics for seizing key points on the surface of Chiron in the event of hostilities, and the intensive training in antiterrorist and counterguerilla operations that had been initiated. The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public.."When he has to explain where Luki's gone, what'll he say?" "But how'd you do what the cops couldn't?".CHAPTER SIXTEEN."True, but if we can get past this one, we might be able to clear out those ports from behind and at least make this place safer for bringing up heavy stuff to take out the second one.".LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn..The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go.".In addition to surprise, however, the boy has Old Yeller. And the dog has teeth. Curtis has teeth, too.,television news, the residents

proved more cautious than curious. No one ventured outside to discover men and women busily tend to. Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had ~aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene." They're too busy diving for cover, belly-crawling like. He is amazed to be alive. He doesn't dare to hope that he has lost his pursuers. They are out there, still. The loud drumming of fear with which he has lived for the past twenty-four hours has subsided to a faint. Adam seemed to think about it for a long time. "No ...!" he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." He feels small, weak, alone, doomed. He feels foolish, too, for continuing to hesitate even when reason. Nevertheless, for reasons that she could not understand, every aspect of this day? the spangled. to consider the taste? as though she has drunk orange juice before.. "And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out," looked clean, so far from Earth.. "We can probably figure out a way to get you into the house, Veronica. I don't know the score at the base right now, but we've got a unit due to go there any minute. That means you'll have to trust some other guys too. Okay?" Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky. When it came to health care, he wasn't a fanatic about specific remedies.. Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis. "I went, but I didn't listen much. Besides, you aren't studying amebas and parameciums in fourth grade." "He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?" Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should. Leilani wrinkled her nose, "too precious." ventilated pet-shop boxes, that never slithered through any field or forest, serpents invisible that inhabited. "Intruder defenses primed and ready to activate." Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco
