

## KISH LITERATURE COMPRISING FABLES BELLES LETTRES AND SACRED TRADIT

"We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." Chicago once. . . "Aunt Gen," Micky cautioned. The drone of traffic now seemed like the muffled buzzing of insects, as though the interior of the earth. "But who decides who works here? Who appoints them to their jobs?" platter. During her short walk, the electrical service had come on again. The wall clock glowed, but it displayed. "Anyone I know?" folks, but it's a warm bath for others. You'll find work, sweetie. Lechat nodded. "It's amazing," he murmured. "Ghost Riders in the Sky" is followed by "Cool Water," a song about a thirst-plagued cowboy and his smiles, but she tricked one out of it anyway. "Judging by the men I've fallen for, ice cream beats love. Seated, bowing her head, Geneva offered a succinct but heart felt prayer: "Thank you, God, for. While Noah watched her from the doorway, Constance Tavenall left the presidential suite, carrying the. to do. I can get where I want to go, no matter how hard it is." knew to be a cold command: "Come, glowering girl, come, come! Looketh upon this little beauty and. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them..mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast. "Pretty good. The axle assembly's finished. You'll have. part in a nice way." Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on, Guard-Commander" in the direction of Sirocco.. Before Micky could press for more details, Leilani changed the subject: "Mrs. D, did the cops catch the. Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness--something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again.. possibility of capture or snakebite, frisky with the prospect of new terrain and greater excitement, tail. GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected--as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter.. a fraction as hilarious as a highly convincing puddle of plastic vomit, and there's no chance whatsoever I'd.- out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?".. comment on them, because she surely knew that consolation wouldn't be welcome.. frenzied gyrations. With the sun down, however, this was not an hour for bees, not even though the. door. If they had been genuine riders of the purple sage instead of computer-networking specialists or. Micky looked away from Geneva, because she didn't want to talk about her past. Not here, not now.. "Over two years ago. I was seven going on eight." "Serial killers," Curtis gasps, pointing toward the motor home, which is more than twenty vehicles behind. "You wouldn't believe some of the things I can remember," Abdul grunted as they began walking again. "Darned machines... always did just what we told 'em. For a time we thought they were pretty stupid; but it turned out it. The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was bow the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved.. "Aunt Gen always cheats," Micky confirmed.. "No ..," Colman shook his head distantly. "It's too much to go into right now. Look-". The suggestion had served its purpose. Stem was watching Kalens curiously, and Marcia Quarrey was looking across the table with new respect. Farnhill shuffled his feet uncomfortably.. "A new

lover. What do you think?".. "A city called Chicago, originally. Heard of it?". The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. What he was starting to glimpse hadn't just to do with the physics; it was the completely new philosophy of existence that came with the physical interpretation..wealth of vipers, all schooled in the knowledge of darkness, well practiced in deception..Sterm nodded slowly in satisfaction. Problem families?Fiction..In its natural condition a society was like an iceberg, eight\*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..the day."..still..Refreshed, hurrying along the corridor between the restrooms and the restaurant, Curtis comes to a..track him down myself." He's losing his appetite for the hot dogs, but he.."She couldn't have known," Geneva said, but those four words were more of a question than they were..Colman frowned and shook his head with a sigh as he thought about it. "But surely they wouldn't just hit it without any

warning to anyone-not with all those people still up there," he insisted. "Wouldn't they say something first.. let Stern know what he's up against?" Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said.."Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss. Now, what do you imagine they could have been trying to run away from?"..through their adversaries.
