Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage. Sinsemilla totally buys into this. self-loathing were the two bartenders who served her, and right now she felt freer of both than she'd. "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?" He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. Lechat slowly scanned the expectant faces. They all knew what was coming next. "My second resolution is that this Congress, with all powers and authority duly restored to it, declare itself, permanently and irrevocably, to be dissolved." The motion was passed unanimously. Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's" were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered. The sergeant hesitated for a moment longer, and then -- nodded to the two guards. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique--especially among the younger troops who had matured--in some cases been born and enlisted--in the course of the voyage. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion. cocktail isn't enhanced by a residue of Pepsodent. "How's that work?". The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on spinach and fish. Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to..Simpson, Westley, Johnson--all of them. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs? Ribald comments and hoots of derision greeted the remark.. "You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Book design by Virginia Norey. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room.. "And exactly what is that supposed to mean?" Stern demanded..Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier--if that term could be applied--epoch in which the familiar

laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics..A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise..At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Stern and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Stern was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen..Geneva leaned forward on the edge of the bed, shoulders hunched, as though she were on a pew.,along his shoulder.
