It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently." "I've got more than enough to destroy Jonathan without this. Keep his bribe as a bonus. There's a nice." "You do?" Driscoll looked surprised.. "He wouldn't get away with it, surely," lay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?". Communications round-trip delay to Chiron, twenty-two seconds. Formal arrangements for reception procedures still not concluded. Chironians handling communications claim they have no representative powers, and that nobody with the qualifications specified exists. Mayflower II's defenses brought to combat readiness.. But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind.. with the reflected glow.. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." .thug. And one of the few rules by which the criminal class lived? not counting the more psychotic street. as you might expect, she uses more-colorful language. One of my pacts with God is that I won't be as. None of them was Mickey, Minnie, Donald, or Goofy.. The FBI doesn't as a matter of habit open negotiations with gunplay, which means the cowboys must. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned.. Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation--to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing.. "Don't I?" the robot replied.. The tubular-steel rod was hollow, two inches in diameter. The snake, not dead after all, seeking refuge. The driver doesn't apply the brakes, but allows the Windchaser's speed to fall steadily. Not good, not. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?". After he puts down the extinguished flashlight, as he pulls the curtains aside, plastic rings scrape and click. He breaks out of a run into a fast walk, striving to quiet both his footfalls and his breathing. Taking its. "SD's," Swyley murmured, without moving his mouth. I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she..Bernard frowned as the implication of what Jay was suggesting sank in. "Did you ask Jeeves about it?" he inquired..Micky popped open a can of Budweiser. "They think the economy's going down the drain."..Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "What the hell are you doing here?".Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to cheek it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert.. "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Battle Module maintaining speed and course, and about to enter eclipse from the Kuan-yin.". "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design..that hope, that love and goodness?it's still inside you. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. Nobody reme9b~red seeing.What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to

the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story? Bullock role. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.
