The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as Opposed to pride. Weakness or strength. At first Noah didn't get it..In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away.. "Perhaps not quite, but that was twenty years ago, remember. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood..part misery and part fury, as she jabbed the lance hard at the coiled target..CHAPTER THIRTY-ONE.With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that

Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products..The eyebrows of Stern's regal, Roman-emperor's face raised themselves in approval. Hell.Chapter 14.In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it.
