litter. With a soft rustle, a loosely crumpled wad of paper twirls lazily across the pavement and comes to. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." "I don't how." Amy screwed her face up and rubbed the bridge of her nose with a finger. "I suppose I'd have to be crazy." Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. The girl gave Colman a funny look. "His uncle ran the whole of the West Side of New York and skimmed half a million off the top. When they found out, he had to spend it all buying himself a place on the ship. You didn't know?" powder into the wounds with a small syringelike applicator. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." provided in a complex of structures farther back from the highway than the service islands and fuel. Veronica came back into the room and began picking up Mrs. Crayford's boxes. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. "I know--awful. Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. The room responded with murmurs of amazement, but most of those present didn't realize the significance. Colman raised his eyebrows. Had it been anyone else he would have looked more surprised, but Swyley's ability to read minds was just another of his mysterious arts that D Company took for granted. After a few seconds Swyley went on, "They're seducing all of us. That's how they're fighting the war." "So, is this fine young fella the Jay you were telling me about?" "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?" Leilani knocked on the bedroom door. Unlike her mother, she had a respect for other people's personal. Sinsemilla had done, Leilani wasn't in the mood to conjure up Kato. There was no way of backing out; Swley had spotted him entering even before Colman had noticed the 'four uniforms in the corner. The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides.
